

DYNAMO ALFALFA

Explosive Forage Quality & Maximum Tonnage

Dynamo delivers explosive forage quality and maximum tonnage in a fall dormancy class 4 variety. Its rapid regrowth is well suited for 3, 4 and 5 cut harvest management systems. High multifoliate leaf expression, improved crude protein content and exceptional feed value are table stakes for this top performer. Dynamo's unparalleled combination of high yield and improved Relative Feed Quality (RFQ) will produce more milk per acre guaranteed. Complimented by superior winterhardiness and outstanding disease resistance index scores, including Aphanomyces Race 1 and Race 2 resistance, Dynamo will generate high-flying forage production and more milk.

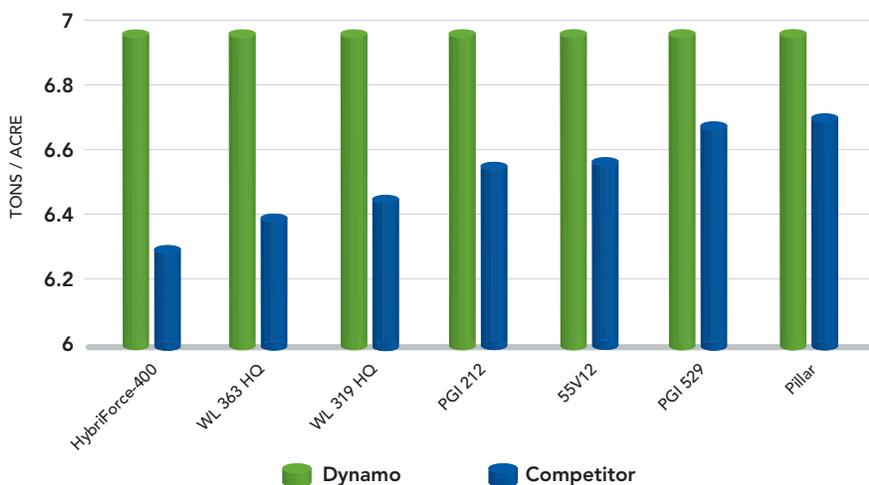

Genetic Background

Dynamo is an eye-catching variety with a dense canopy and dark green foliage at bud stage. It was selected from elite parent plants that showed high forage yield, high milk per acre and excellent winter hardiness.
