

DOMINATOR

PERENNIAL RYEGRASS

Bred to Withstand Harsh Conditions

Dominator perennial ryegrass has been bred to withstand challenging conditions. It demonstrates strong performance in saline conditions and less than ideal soil. Dominator has exceptional levels of resistance to crown rust, stem rust, red thread and gray leaf spot.

Drought Tolerance

Drought conditions can strike at any time so it's important to be prepared. Dominator has excellent drought tolerance and will maintain a high level of green cover and turf quality through periods of high heat and low moisture.

Visually Appealing

With a rich, dark green color and finely textured leaves, Dominator provides a high-quality turf that looks as good as it performs.

Turf Quality "Schedule B" (Medium Maintenance/Athletic Field)

NTEP 2005 – 2009 Data

Variety	Mean
Grand Slam 2	6.1
Manhattan 5 GLR	6.1
Charismatic II GLSR	6.0
