

# RELOAD ALFALFA

## Reload your field with superior tolerance to disease and saturated soils

Reload is the newest generation of branch rooted alfalfa. Selected for high genetic resistance against multiple strains of Aphanomyces Race 2, as well as other diseases and pests that are harmful to alfalfa. Its exceptional disease package supports and enhances seedling survival and persistence.

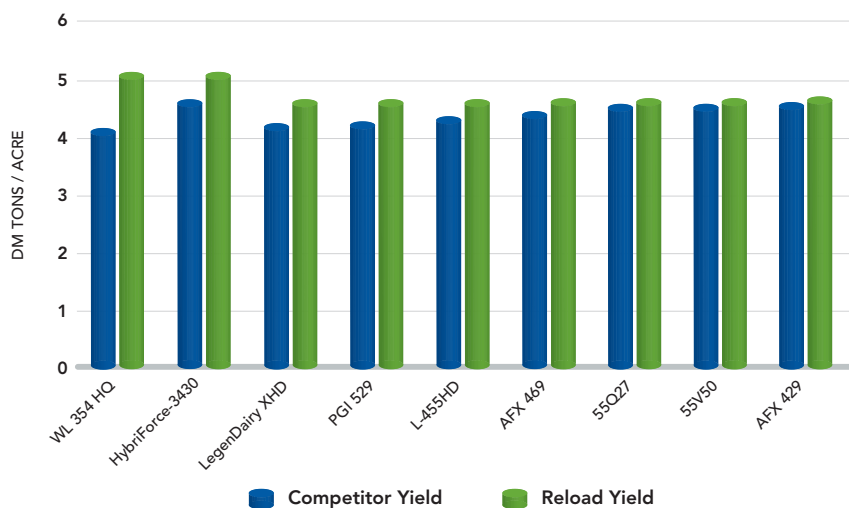

### Branch rooted characteristics

The branch rooted trait delivers improved root protection and durability in the ground during periods of freezing and thawing. Branch rooting has also proven beneficial under wetter conditions, and improved tolerance to saturated soils. Reload is also well suited to normal, well-drained soils to produce optimal yields over the life of the stand.

Reload's Root System

### Head to Head Yield Performance

\*Number of harvest years range from 2-8 and trials 1-4 per variety comparison.  
Trial locations: West Salem, WI, Medford, MN, Clinton, WI, Stratford, WI.

### Key Characteristics

- Branch root characteristics
- Multiple strain resistance to Aphanomyces
- High tolerance to saturated soils
- Long and productive stand life
- Broad adaptation to a range of conditions

### Agronomic Traits

	RATING
Fall Dormancy	4.0
Winter Hardiness	1.7
Root Type	Branch
Disease Resistance Index	34/35

### Disease Resistance

	RATING
Anthracoze	HR
Aphanomyces Root Rot (Race 1)	HR
Aphanomyces Root Rot (Race 2)	R
Phytophthora Root Rot	HR
Bacterial Wilt	HR
Fusarium Wilt	HR
Verticillium Wilt	HR

### Pest Resistance

	RATING
Blue Alfalfa Aphid	R
Pea Aphid	MR
Spotted Alfalfa Aphid	R
Cow Pea Aphid	R
Stem Nematode	R
Northern Root Knot Nematode	-
Southern Root Knot Nematode	-
