

# REVOLVER ALFALFA

## Keep your barrel loaded with this high-powered yield leader

Revolver is a new yield leader in the semi-dormant alfalfa category. Fast recovery after harvest makes it well suited for aggressive hay or haylage management systems. Plus, its premium forage quality is designed to meet the needs of the most selective commercial hay producers and dairy operations. Make no mistake, Revolver will produce more milk from your herd.

Revolver shows high levels of genetic resistance to the major diseases and pests that impact alfalfa production, including Aphanomyces Race 1, Race 2, and stem nematode. All of which contribute to a long stand life and insures you will never run out of ammunition to protect your rations. Revolver is broadly adapted to a wide range of growing conditions and environments.

## Head to Head Yield Performance
