

SHOCKWAVE BR ALFALFA

THE MARK OF PURE PERFORMANCE

Branch Rooted to Tolerate Wet Soils

Shockwave BR combines a branch rooted trait with a superior disease resistance package to deliver outstanding performance. In areas that can have higher water tables, the branch root of Shockwave BR allows it to keep more of the root system above the water table and also gives it a better resistance to heaving pressure created from freeze-thaw cycles. This characteristic, combined with Shockwave BR's high forage yield, make it a productive variety in both normal and wetter conditions.

BY Alpha – The Mark of Pure Performance

It starts with elite genetics. But it's not just outstanding yield and quality. Through teamwork and production expertise, only the purest seed arrives at our accredited facilities for processing, testing and quality assurance. These top performing varieties deliver increased yield, better nutrition, and more milk per acre. Guarantee your seed investment with BY Alpha – the Mark of Pure Performance.

Branch Rooted Alfalfa

Shockwave BR has a branch rooted trait that allows it to perform better in higher water tables.
