Forages

Dynamo delivers explosive forage quality and maximum tonnage in a fall dormancy class 4 variety. Its rapid regrowth is well suited for three, four, and five cut harvest management systems. Dynamo's unparalleled combination of high yield and improved Relative Feed Quality (RFQ) will produce more milk per acre guaranteed.

Complimented by superior winterhardness and outstanding disease resistance index scores, including Aphanomyces Race 1 and Race 2 resistance, Dynamo will generate high-flying forage production and more milk. Dynamo was selected from elite parent plants that showed high forage yield, high milk per acre and excellent winter hardiness.
