

AAC Torque Hybrid Bromegrass

HIGH YIELDS AND ENHANCED REGROWTH

FEATURES

High first-cut forage yield

Improved regrowth vs. smooth bromegrass

Good winterhardiness bred for Canadian conditions

Palatability	Excellent
Yield	Very Good
Winterhardiness	Very Good
Forage Quality	Very Good

Excellent > Very Good > Good > Poor

Forages

AAC Torque is a high yielding multi-purpose brome grass suited for hay and pasture applications. Created from a cross of meadow and smooth brome, hybrid brome grass combines high first cut yield from smooth brome grass with enhanced regrowth from meadow brome grass.

AAC Torque was developed and tested in Western Canada by Agriculture and Agri-Food Canada in association with the University of Saskatchewan. In regional trial AAC Torque showed an overall 8% higher forage yield than AC Knowles, with slightly higher overall forage yields to AC Success.

Forage Dry Matter Yield

DISTINCT BY DESIGN

At BrettYoung we are proud of the strategic partnerships we have with world-class organizations through which we source leading technologies and genetics. This allows us to bring **distinct** market choices that deliver you performance and value. **By design**, our success will always be rooted within your success. Like you, we are independent, resolute, and **Distinct By Design**.
