

BOBCAT RED CLOVER

Impressive Forage Yield and Disease Resistance

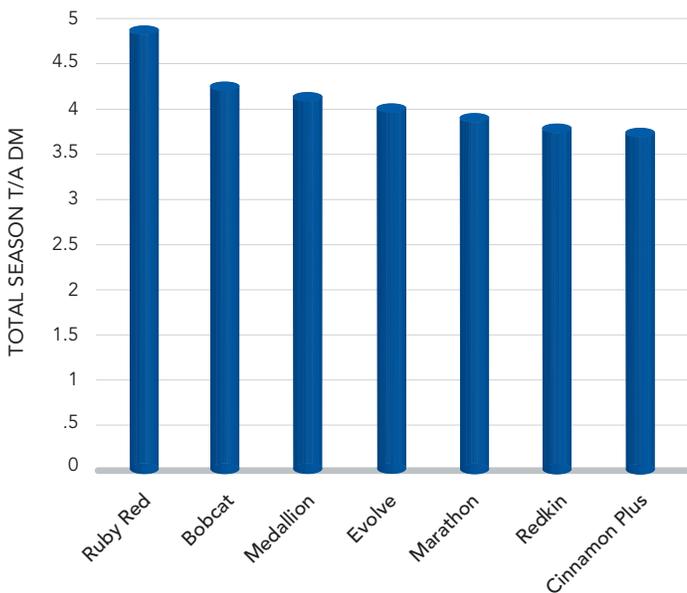

Bobcat is a high performing double-cut red clover that features high forage yield and excellent forage quality with very good stand persistence. It offers excellent disease resistance and is highly resistant to Northern Anthracnose and Powdery Mildew, resistant to Black Patch and tolerant to Alfalfa Mosaic Virus.

Dry Matter Yields

Red clover forage yield (tons/acre), Lexington KY 2023

Cornell Red Clover Forage Trials (tons/acre), Ithaca NY 2022

Key Characteristics

- High forage yield
- Excellent forage quality
- Stand persistence
- Disease resistance
